

## **Project Description – Samarth Sports Desktop Application**

**Samarth Sports** is a desktop-based application designed to streamline and manage the daily operations of a sports shop. The application provides a comprehensive set of features to handle business activities efficiently, including:

- **Customer and Company Management** – Add, update, and manage customer and company details.
- **Product & Inventory Management** – Add new products, track available stock, and manage product details.
- **Billing System** – Create new bills, browse existing bills, and generate quotations.
- **Quotations Management** – Create, store, and browse quotations for customers.
- **Reporting** – Generate detailed reports using **Crystal Reports** for sales, stock, and other business requirements.

The application ensures ease of use, improves accuracy in billing and inventory tracking, and helps shop owners maintain complete control over their business operations.
